

TTMA APPLAUDS FLOUR PRODUCERS

The Trinidad and Tobago Manufacturers' Association (TTMA) commends its members, Nutrimix, National Flour Mills and Sheik Lisha Limited for announcing their intended price decrease on flour in the near future.

The decision by these companies to reduce flour prices due to the global decrease in price grain indicates that manufacturers continue to be conscious of the impact their products have on the cost of living for consumers. The domino effect of this global decrease in the price of grain highlights the potential impact of external factors on manufacturers.

Manufacturers in Trinidad and Tobago continue to be optimal in their production and pricing up to the factory gate. However, factors external to the manufacturing process, such as the global price of flour, has an impact the cost of goods to consumers.

The Association is hopeful that as the global economy continues to regularize in its post-COVID period, it will continue to have a positive impact on the consumer in the future.
